PROFESSIONAL SUMMARY

Results-driven Full Stack Developer with 3+ years of experience in designing and developing scalable web applications, SaaS products, enterprise dashboards, and business management systems using React.js, PHP, Laravel, MySQL, JavaScript, and REST APIs.

Experienced in leading complete product development from UI implementation to backend integration, architecture planning, and deployment. Skilled in building multi-role platforms including Admin, Recruiter, Institute, Student, ERP, Blockchain, Restaurant Management, Finance, and E-commerce systems.

Passionate about creating clean, reusable, responsive, and high-performance applications with exceptional user experiences. Strong problem-solving skills with hands-on experience delivering both corporate and freelance projects across multiple industries while collaborating with cross-functional teams to build production-ready solutions.

TECHNICAL SKILLS

Frontend	React.js	JavaScript (ES6+)	HTML5	CSS3	Tailwind CSS	Bootstrap	Material UI
Backend	Core PHP	Laravel	REST APIs	Basic Node.js			
Database	MySQL	PostgreSQL					
Tools & Technologies	Git	GitHub	Postman	VS Code			
Other Skills	API Integration	Responsive Web Development	Dashboard Development	RBAC	Authentication & Authorization	Performance Optimization	UI/UX Implementation
	Debugging & Troubleshooting						

PROFESSIONAL EXPERIENCE

Software Developer – Brightorial, Balaghat	June 2025 - Present
- Leading the development of JobSahi, a large-scale recruitment and career management platform. - Developed and maintained multiple web application panels including Admin, Recruiter, Institute, and Student portals with role-based access management. - Built scalable React.js applications with reusable architecture and integrated PHP/Laravel REST APIs. - Implemented dashboards, recruiter management, institute management, student workflows, placement modules, campus drive management, reports, analytics, and permission-based administration. - Collaborated closely with UI/UX designers and backend developers to deliver production-ready enterprise solutions. - Optimized application performance, improved code reusability, and enhanced user experience across multiple modules.	
Software Developer – MBG Card, Jabalpur	March 2025 - May 2025
- Developed frontend workflows using React.js and built reusable UI components. - Worked on backend APIs using Node.js. - Integrated REST APIs and optimized application performance.	

Web Developer – Swaraj Finpro, Jabalpur

May 2022 – January 2025

- Developed financial dashboards and investment-related web applications.
- Built Goal Tracker and multiple financial calculators.
- Developed reusable React components and Material UI interfaces.
- Integrated backend APIs and reporting modules.
- Worked closely with business teams to implement finance-focused solutions.

■ FREELANCE PROJECTS

MobiMatch – Mobile Accessories Management Platform

- Currently building a complete product for mobile accessories retailers.
- Developed an intelligent mobile accessory compatibility engine to help users identify compatible accessories based on mobile brand and model.
- Built inventory management, order management, customer management, supplier management, reporting, and analytics modules.
- Developing scalable admin dashboards with reusable React components and API-driven architecture, designed to support future product expansion and large-scale business operations.

Restaurant & Guest House Management System

- Developed a complete Restaurant Management System for handling daily restaurant operations.
- Implemented table booking, order management, billing, inventory management, customer management, reports, and analytics.
- Built an integrated Guest House Management module including room booking, check-in/check-out, customer records, and payment management.
- Developed responsive dashboards with role-based access for administrators and staff.

Blue Falcon Technologies – Blockchain Platform · bluefalcon-technologies.com

- Contributed to the development of blockchain-based web solutions using modern React.js architecture.
- Developed responsive interfaces for blockchain dashboards and Web3 management systems.
- Worked on scalable UI components, API integration, and enterprise-grade blockchain applications.
- Focused on performance, security, and seamless user experience while collaborating with the development team.

Investrack – Finance Platform · investrack.co.in

- Developed responsive financial dashboards and investment tracking modules.
- Built reusable UI components and integrated secure REST APIs.
- Improved application performance and user experience across financial management workflows.

ShreeRam Store – E-commerce Platform · shreeram.webbiezinfotech.in

- Developed a complete e-commerce website with Admin Panel.
- Built product management, order management, customer workflows, and responsive user interfaces.
- Integrated backend APIs and optimized application performance.

■ EDUCATION

Master of Computer Applications (MCA)

Khalsa College, Jabalpur

2023 – 2025

Bachelor of Computer Applications (BCA)

Nachiketa College of Computer Science & Technology, Jabalpur

2019 – 2022

■ INTERESTS

Full Stack Product Development

Artificial Intelligence & Emerging Technologies

Business & Finance Applications
